`downloads` `3.1M/month`

PyInstaller bundles a Python application and all its dependencies into a single package. The user can run the packaged app without installing a Python interpreter or any modules.

Documentation: <https://pyinstaller.org/>

Code: <https://github.com/pyinstaller/pyinstaller>

PyInstaller reads a Python script written by you. It analyzes your code to discover every other module and library your script needs in order to execute. Then it collects copies of all those files – including the
